2. Select **Inquiry audio device** to search for available Bluetooth headsets.
3. After searching, press **LSK(Pair)**.
4. Enter the password for pairing the Bluetooth headset.
5. After the phone sets up a connection with the headset, the headset icon is displayed on the standby screen and you can use the headset in this case.

TRANSFERRING DATA

1. Select **Menu > Settings > Bluetooth > Enable**. Then select On to enable the Bluetooth function.
2. Select **My device > Inquiry new device** to search for available Bluetooth devices and then pair the phone with the desired device.
When a Bluetooth device sets up a connection with the phone for the first time, a pairing password needs to be entered for verification.
3. After pairing, you can transfer data between the phone and the Bluetooth device.

WEB CAM

Your phone can function as a webcam. When the phone and the PC are powered on, after you connect the phone to the PC, you can have a video chat through the phone camera.

1. Connect the phone to the PC through the USB cable.
2. Set the USB mode to Webcam.
3. Start the browser on the PC to log in to a Web site.
Start the video tool installed on the PC to have a video chat

14 WARNINGS AND PRECAUTIONS

This section contains important information pertaining to the operating instructions of your device. It also contains information about how to use the mobile safely. Read this information carefully before using your device.

ELECTRONIC DEVICE

Power off your device if using the device is prohibited. Do not use the device when it causes danger or interference with electronic devices.

MEDICAL DEVICE

- Power off your device and follow the rules and regulations set forth by the hospitals and health care facilities.
- Pacemaker manufacturers recommend that a minimum distance of 15 cm be maintained between a device and a pacemaker to prevent potential interference with the pacemaker. If you are using a pacemaker, use the device on the opposite side of the pacemaker and do not carry the device in your front pocket.
- Some wireless devices may affect the performance of the hearing aids. For any such problems, consult your service provider.

POTENTIALLY EXPLOSIVE ATMOSPHERES

Switch off your device in any area with a potentially explosive atmosphere, and comply with all signs and instructions. Areas that may have potentially explosive atmospheres include the areas where you would normally be advised to turn off your vehicle engine. Triggering of sparks in such areas could cause an explosion or fire, resulting in bodily injuries or even deaths. Do not switch on the device at refueling points such as service stations. Comply with restrictions on the use of radio equipment in fuel depots, storage, and distribution areas, and chemical plants. Also, adhere to restrictions in areas where blasting operations are in progress. Before using the device, watch out for areas that have potentially explosive atmosphere that are often, but not always, clearly marked. Such locations include areas below the deck on boats, chemical transfer or storage facilities and areas where the air contains chemicals or particles such as grain, dust, or metal powders. Ask the manufacturers of vehicles using liquefied petroleum gas (such as propane or butane) if this device can be safely used in their vicinity.

TRAFFIC SECURITY

Observe local laws and regulations while using the device. Also, if using the device while driving a vehicle, please comply with the following guidelines:

- Concentrate on driving. Your first responsibility is to drive safely.
- Do not talk on the device while driving. Use hands-free accessories.
- When you have to make or answer a call, park the vehicle at the road side before using your device.
- RF signals may affect electronic systems of motor vehicles. For more information, consult the vehicle manufacturer.
- In a motor vehicle, do not place the device over the air bag or in the air bag deployment area. Otherwise, the device may hurt you owing to the strong force when the air bag inflates.
- Do not use your device while flying in an aircraft. Switch off your device before boarding an aircraft. Using wireless devices in an aircraft may be dangerous to the operation of the aircraft, disrupt the wireless telephone network, and may be considered illegal.

OPERATING ENVIRONMENT

- Do not use or charge the device in dusty, damp or dirty places or places with magnetic fields. Otherwise, the circuit may not function properly.
- The device complies with the RF specifications when the device is used near your ear or at a distance of 1.5 cm from your body. Ensure that the device accessories such as a device case and a device holster are not composed of metal components. Keep your device 1.5 cm away from your body to meet the requirement earlier mentioned.
- On a thunder and stormy day, do not use your device when it is being charged, to prevent any danger caused by lightning.
- When you are on a call, do not touch the antenna. Touching the antenna affects the call quality and results in increase in power consumption. As a result, the talk time and standby time are reduced.
- While using the device, observe the local laws and regulations, and respect others' privacy and legal rights.
- Use accessories authorized by manufacturers. Using unauthorized accessories will render the warranty null and void.
- Keep the ambient temperature between 0 and 45 degree centigrade while the device is being charged. Keep the ambient temperature between -10 to 55 degree centigrade for using the device powered by battery.

PREVENTING HEARING DAMAGE

Using the receiver, ear buds, headphones, speakerphone, or earpieces at high volume can result in permanent hearing loss. Be extremely careful when listening at high decibel levels. Set the volume to a safe level. If you experience strange sounds in your ears like ringing or if you hear muffled speech, get your hearing checked. If you continue to use high volume, your hearing will soon get affected. Hearing experts offer the following suggestions to protect your hearing:

- Reduce the time you use the receiver, earbuds, headphones, speakerphone, or earpieces at high volume.
- Do not increase the volume to block noisy surroundings.
- Reduce the volume if you cannot hear people speaking near you.

SAFETY OF CHILDREN

Please comply with all precautions with regard to children's safety. Letting the child play with your device or its accessories, which may include parts that can be detached from the device, may prove dangerous, as it may present a choking hazard. Make sure that small children are kept away from the device and accessories.

ENVIRONMENT PROTECTION

Follow all the local regulations regarding the disposal of your devices or electrical accessories (such as chargers, headsets, or batteries). Recycle them. Do not dispose of an exhausted battery or a used device in a garbage can.

ACCESSORIES

Use only the accessories, such as the charger, battery, and headset, delivered by manufacturer. Using accessories of other manufacturers or vendors with this device model might invalidate any approval or warranty applicable to the device, might result in the non-operation of the device, and might be dangerous.

BATTERY AND CHARGER

- The battery can be charged and discharged hundreds of times before it eventually wears out. When the standby time and talk time are shorter than normal, replace the battery.
- Use the AC power supply defined in the specifications of the charger. An improper power voltage may cause fire or the charger may not function properly.

- If the ambient temperature is considerably low or high, the capacity and life of the battery is reduced. When the temperature is lower than 0°C, performance of the battery is affected.
- Do not connect two poles of the battery with conductors such as metal materials, keys or jewelries. Otherwise, the battery may be short-circuiting and may cause injuries and burns on your body.
- Do not disassemble the battery or solder the battery poles. Otherwise, it may lead to electrolyte leakage, overheating, fire, or explosion.
- If battery electrolyte leaks out, make sure that the electrolyte does not touch your skin and eyes. When the electrolyte touches your skin or splashes into your eyes, wash your eyes with clean water immediately and consult a doctor.
- If the battery is damaged, or the color changes or gets abnormally heated while you charge or store the battery, remove the battery immediately and stop using it. Otherwise, it may lead to battery leakage, overheating, explosion, or fire.
- If the power cable is damaged (for example, the lead is exposed or broken), or the plug loosens, stop using the cable at once. Otherwise, it may lead to electric shock, short-circuit of the charger, or a fire.
- Do not dispose of batteries in fire as they may explode. Batteries may also explode if damaged.

CLEARING AND MAINTENANCE

- The device, battery, and charger are not water-resistant. Keep them dry. Protect the device, battery and charger from water or vapor. Do not touch the device and charger with a wet hand. Otherwise, it may lead to short-circuit or malfunction of the device and electric shock to the user.
- Do not place your device, battery, or charger in places where it can get damaged because of collision. Otherwise, it may lead to battery leakage, device malfunction, overheating, fire, or explosion.
- Do not place magnetic storage media such as magnetic cards and floppy disks near the device. Radiation from the device may erase the information stored on them.
- Do not leave your device, battery, or charger in a very hot or cold place. Otherwise, they may not function properly and may lead to a fire or an explosion.
- If the ambient temperature is considerably low or high, the capacity and life of the battery is reduced. When the temperature is lower than 0°C, performance of the battery is affected.

- Do not place sharp metal objects such as pins near the earpiece. The earpiece may attract these objects and hurt you when you are using the device.
- Before you clean or maintain the device, power off the device and disconnect it from the charger.
- Do not use any chemical detergent, powder, or other chemical agents (such as alcohol and benzene) to clean the device and the charger. Otherwise, parts of the device may get damaged or a fire can be caused. You can clean the device and the charger with a piece of damp and soft antistatic cloth.
- Do not dismantle the device or accessories. Otherwise, manufacturer is not liable to pay for damages as the device and accessories are not covered by warranty.

EMERGENCY CALL

You can use your device for emergency calls in the service area. The connection, however, cannot be guaranteed in all conditions. You should not rely solely on the device for essential communications.

15 DISCLAIMERS

Features and specification specified in this manual are subject to Change without prior notice. Certain mobile phone features may not be Activated by your service provider, and/or their network settings may limit the feature's functionality. Services and some features such as GPRS, E-mail may be dependent on the network, SIM card, as well as on the Compatibility of the devices used and the content formats supported, and may require network/service subscription/solutions. Data transfer Speeds are network dependent. You must use the same Bluetooth Profile to enable the Bluetooth devices to communicate with one another. To determine the profiles supported by other Videocon products, visit <http://www.videoconmobiles.com> For other devices, contact their respective manufacturers. Certain Bluetooth features including those listed may not be supported by all compatible Bluetooth enabled devices, and/ or the functionality of such features may be limited in certain devices, or certain wireless carriers. Always demand for original Videocon mobile phones to protect yourself from buying tinkered and/or used or tampered phones. Buy Videocon tested and Videocon certified compatible accessories and add-ons. The warranty is applicable only for Videocon phones, the company is not responsible for any loss or theft. Always use Videocon original Enhancements (including batteries) for safety. The use of any other type may invalidate warranty applicable to the mobile phone and can also be dangerous. The phone is designed to operate using Lithium ion batteries approved by the Videocon phone manufacturers. Using non approved batteries with the phone may result in poor performance and can cause damage to the phone or its enhancements or attachments. The display and products visualization here are for illustrative purposes only. All features, functionality and other product specifications are based on the latest available information and are correct at the time of printing, however such product specifications are subject to change without notice based on newer versions and enhancements. The unauthorized copying of copyrighted material is not legal and is inimical to the provisions of the Copyright Laws of India and other countries.

Kindly refer to <http://www.videoconmobiles.com> website for knowing newer versions of information provided in this manual, which might be of further use.
